

Day 35 – Voice & AI API Integration Layer

Objective

To build a **bridge between Django backend and AI/voice services**.

Tasks & Learning Scope

1. **AI API Study**
 - LLM APIs
 - Speech-to-Text (STT)
 - Text-to-Speech (TTS)
 2. **Call Service Integration**
 - Outbound call trigger
 - Voice selection logic
 - Language handling
 3. **AI Bridge Service**
 - Central service class
 - API retries & fallbacks
 - Error handling
 4. **Security**
 - API key protection
 - Rate limit handling
-

Deliverables

AI bridge APIs

Voice call integration

Error-safe service layer

Learning Outcome

- Intern integrates third-party AI services
- Understands API resilience
